Five Things We All Can Do For Earth Day and Climate Change

1. **Reduce Your Water Intake**
   Take shorter showers, turn off the faucet while you’re brushing your teeth, only wash full loads of laundry.

2. **Unplug**
   Electronic devices plugged in on “standby” mode account for up to 10% of your home’s energy use. Unplug when not charging.

3. **Turn the Lights Off**
   Turning the lights off is a cost-effective way to reduce wasted energy. Utilizing LED lights use lower wattage are also effective.

4. **Reduce Your Plastic Usage**
   Invest in a waterfilter to reduce water bottle purchases, carry your own reusable water bottle, bring your own bags or totes to the grocery store. Stop using plastic straws.

5. **Drive the Speed Limit**
   You can improve your car’s fuel economy by 7 to 14% simply by obeying the speed limit.
